

Senior Telecommunications Engineer

Brunel Australasia are looking to speak with experienced Telecommunication Engineers with a design and execution background. We are working with an established tier one contractor on project scope based in Perth.

Summary

- Publication: PUB295527
- Market: Services
- Industry: IT & Telecom
- Area of expertise: Network, Systems, Telephony & Hardware
- Hours per week: 40
- Education level: Professional Bachelor
- Closing date: Saturday, 3 April 2021

Job

Do you have exposure in PCS/OT network switch configuration, or working with LTE network and infrastructure design, or perhaps both? Brunel are keen to speak with you!

About you

- Development of communications system high level and detailed design documentation such as scope of works, design criteria, commissioning procedures
- Management of small teams performing construction and testing
- Interface with vendors to ensure compliance with project specifications
- Development of engineering / design effort hour estimates
- Involvement and promotion of Safety in Design on communication projects
- Providing technical guidance to colleagues and other teams, specifically in relation to network design
- Factory acceptance test witnessing of PCS and/or LTE network components

What we offer

The client is an instantly recognisable 'tier one' contractor working on fast-paced projects. This scope in particular has an opportunity to win further work through efficient delivery.

- Ongoing work opportunity in a design hub of the business.
- Locally based in Perth CBD.
- Directly assigned Brunel support throughout your contract.
