

Cost Controller

Brunel have partnered with a leading International OEM to successfully recruit and place a suitably qualified Cost Controller to support our Clients Commercial & Risk Management Department.

- Permanent position
- ASAP Start Date
- Perth CBD Office Location

Summary

- Publication: PUB297348
- Market: OilGasAndMining
- Industry: Mining
- Area of expertise: Cost Control & Procurement
- Hours per week: 40
- Education level: Other
- Closing date: Monday, 19 April 2021

Job

The primary role of the Cost Controller is to assist the Commercial Project Manager (CPM) and Project Manager (PM) in the delivering assigned projects to their agreed financial outcomes through effective cost / financial management.

Assist the PM and CPM in the identifying and gaining approval of change requests. Assist the accounting department in establishing and coding the cost centres, thus insuring that the integrity and consistency of the project's cost data bank are maintained.

Develop and maintain the project financials in SAP / EcoSys. Monitor the project's cost trend and notify the project's management of any significant escalating cost and suggest possible corrective actions.

Produce regular and accurate cost reports and cost curves.

About you

- STEM or Commerce Degree combined with site and home office cost experience or significant site and home office cost experience.
- Membership of a relevant professional body – Desirable.
- Relevant finance and/or cost controlling experience.
- Knowledge of project costing;
- Ability to produce cost forecasts;
- Ability to extract from contract documents requirements of cost control and invoicing;
- Ability to use standard costing packages and Microsoft packages, especially spreadsheets and databases;
- Ability to produce reports and status documents to a fixed timetable;
- Ability to work autonomously.
