

Senior Process Engineer

Our client, a leading Mining EPC company, is on the hunt for a Senior Process Engineer in Toronto.

The Senior Process Engineer is ready to provide solutions for our mining and industrial projects. Someone with a strong gold and base metals background with experience in construction, commissioning and operations will be well suited for this role.

Summary

- Publication: PUB298502
- Market: OilGasAndMining
- Industry: Mining
- Area of expertise: Engineering & Design
- Hours per week: 40
- Education level: Academic Bachelor
- Closing date: Monday, 26 April 2021

Job

Responsibilities:

- Leading process design during studies, basic and detailed engineering project phases;
- Provide technical support of process design work including calculations, drawings and testwork;
- Budget and resource forecast management for the process study scope;
- Interface with other engineering disciplines to deliver best practice process design;
- Liaise and contribute to the Global Process Team;
- Expected to stay abreast of latest process technology developments;
- Design innovation / lean thinking into process designs;
- Demonstrate leadership in industry safety protocols.

About you

Requirements:

- 10 years of mineral processing experience with gold and base metals, preferably with proven field experience (construction, commissioning and/or operations);
- Experience with EPCM studies and projects;
- Minimum of 5 years in a consulting engineering capacity;
- Ability to effectively translate field and engineering experience to other process staff and design activities;
- Leadership abilities including project management skills, lead design role capability and supervisory skills;
- International experience will be favored;
- Bachelor's degree in Mineral Processing, Extractive Metallurgy or Chemical Engineering;
- PEng registration in Ontario preferred.
